DETAILED ACTION

This communication is in response to amendment filed 10/23/07.

Response to Amendment

The amendments include:

Amended, previously presented or original claims: 1, 4, 6-54 & 67-71

New claims: 72-73

Canceled claims: 2-3, 5 & 55-56

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The following is a statement of reasons for the indication of allowable subject matter: the prior art fails to teach or suggest the limitation of independent claims. The Applicant has claims an on-line credit approval system and method.

Independent claim 1 discloses a method of offering financial product to a customer who has not applied for the financial credit by conducting a credit review and using identification information to offer a financial product.

Independent claim 32 discloses a method of offering financial product to a customer who has not applied for the financial credit by forwarding the information to a financial institution that conducts a credit review and using identification information to offer a financial product.

Independent claim 43 discloses a system of offering financial product to a customer who has not applied for the financial credit by conducting a credit review and using identification information to offer a financial product.

Independent claim 57 discloses a system of offering financial product to a customer who has not applied for the financial credit by forwarding the information to a financial institution that conducts a credit review and using identification information to offer a financial product.

Independent claim 71 discloses a method over a web site of offering financial product to a customer who has not applied for the financial credit by conducting a credit review and using identification information to offer a financial product.

The following prior art references have been deemed most relevant to the allowed claim(s):

Walker (US Patent 6,088,686) teaches a credit approval method in system including performing a credit review process and retrieving customer data used to determine the financial products they may be eligible for. The credit review process includes analyzing an applicants credit bureau history and automated credit scoring. In Walker the applicant directly applies for the financial product they are seeking.

Eliason (Online Business Computer Applicants Book ISBN: 0-02-332-461-9) teaches one how to automate any existing process into an on-line process.

Claims 1, 4, 6-54, 67-73 are allowed because Walker and Eliason references as discussed above as the Closest Prior art of record fails to teach or suggest a method **where the customer is actually not applying for any financial product. In contrast the customer is actually purchasing something unrelated to a financial product and the information retrieved in this process is used to review the credit and information to determine if the customer would be eligible for a financial product. The customer is unaware the credit review ever happened.**
